Heather,

The contract for AECOM (with Ascent as subcontractor) was \$150,000. Of course, that doesn't include staff time.

Subject: Yolo CAP cost

Hi David and Heidi,

I am proposing a mitigation measure for a project in Marin County whereby the project applicant would fund a Countywide CAP for GHG mitigation. I am gathering data on how much Countywide CAPs have cost. Could you please remind me the total contract value for Yolo County's CAP? Honey thought it was \$150k-175k, but wasn't certain.

If you can confirm this info, would you be comfortable being cited as a pers. comm. in Marin County's document?

Hope you are both doing well. Thanks for any info you can provide!

-Heather
